Picture Script Changes for GEDCOM 5.5 Export

These are the changes to the PediTree Picture Scripts for GEDCOM 5.5 export to Family Tree Maker. On the left are the existing scripts for Elton55 version 1510; on the right the new ones for version 2103. The significantly-altered text on the right is highlighted, ignoring some layout changes that don't matter. The first three are for groups event, occupation and residence. The name of the group is left on the heading, the script-name on the right. The last five scripts are for the Person (1 + PLAN...) and Source records (3). The last two are **new** Source picture scripts GCITE & GSCITE, which *need to be added before* other changes are made.

Version 1510

```
event picture script GED
        [|"2 DATE "date]
        [|"2 PLAC "place]
        [|"2 SOUR @S-"source.rin"@"
